

SANKARI STUDIOS: CHARITABLE PARTNERSHIP OPPORTUNITIES

Sankari is a Mission Driven Public Benefit Corporation.

Our Mission: "To engage, educate and inspire people to improve the social, economic and environmental well-being of our planet through pro-social gaming, community building, e-commerce and charitable giving".

The Sankari Universe is about immersive, entertaining and collaborative game spaces that facilitate learning, communication and make it easy for players to connect, share and mobilize to help solve our planet's problems. We are laser focused on creating virtual content that has a positive impact in the real world and brings together the global community to magnify this impact. Our focus with everything we create is to develop technologies and platforms that are inclusive, accessible and inspiring to people across all languages and cultures.

Every mobile game has a story about its educational benefits. The instructive potential of gaming has been undervalued and overstated since the first gamer booted the first Magnavox Odyssey. So, we understand when we talk about education and KATOA, we're met with skepticism. It's a game about a little sea turtle trying to find some seagrass.

SO, WE HAVE TO LOOK BACK

Most progressive educational modalities have roots in crisis. Post-World War II Europe, as it recovered from a devastating global cataclysm, became a world-wide catalyst for education reform. The goal was a generation of citizens driven by empathy, community-building, and mobilized for change, that no war, no crisis of such scale and destruction would ever be repeated. Their meta-goal was a systemic global revolution of peace.

OURS IS A REVOLUTION OF PLANETARY EXSITENCE

Research shows people know time is out for the unprecedented realities of climate changes. They are desperate for solutions. Sankari Studios will be the first gaming company to fully ignite a modern, educated citizenry, empowered by one the more universal, democratic, and

powerful platforms in human history. The answers to our crisis are in the hands of every smart phone owner worldwide. They just need to play.

Players learn how to grow, nurture, and restore habitats, and to support and defend living creatures. Engagement with the game leads to increased awareness of environmental issues. Achievements in the game result in real-world acts of preservation. An emotional connection between player and issuers through story, character, and solutions, transforms personal behaviors, voting habits, and localities. **PLAY THE GAME, SAVE THE WORLD!**

Learning-based activism is the future. The KATOA model stands to revolutionize the success of global equity, social, economic, environmental, and philanthropic causes. It's no overstatement to compare this relentless potential with that of the printing press. Or the lightbulb. Or penicillin. Anything that changes the world, changes it forever.

Our goal: Building a valuable company with a Return on Humanity (ROH)! Think "Ready Player One" for positive impact and the ability to solve the world's problems one fun game at a time.

As a mission driven PBC we have several charitable funding opportunities outlined below that are tied to the development and launch of "KATOA", an immersive gaming and educational learning space focused on the world's eco-systems, climate literacy and climate equity. Grants and donations can be made to either the [Sankari Programs Fund 501c3](#) or [the Sankari Foundation](#).

- **Sankari 501c3s**
 - **Sankari Programs Fund (501c3):**

Sankari can receive direct grants into its Sankari Programs Fund 501c3 to conduct and translate scientific research and develop educational game play and climate literacy platforms based on this research. This includes trail blazing behavioral data, new ways of learning, learning based activism and targeted education in careers in the blue and green economies.
 - **Sankari Foundation (Donor Advised Fund 501c3):**

Sankari can receive direct grants & philanthropic capital via this DAF. 100% of this capital is deployed to underwrite game impact points and is then directly allocated by players to KATOA's vetted conservation partners and ecopreneurs.
